

How much does it rain in a Celtic Rainforest?

The Welsh Celtic Rainforests are generally found on the Western side of the country.

Using the rainfall figures in the table can you explain why?

Subject:

Science

Skills:

Numeracy

Follow these steps in order to answer the question

- 1) Use the monthly rainfall figures in order to calculate the total rainfall in the woodlands in the west and in the east during 2015.
- 2) Draw a graph that shows the difference in the rainfall between the two sites during the year.
- 3) In which month was the highest rainfall?
- 4) Which location has the highest rainfall?

Rainfall during 2015 mm/month		
	Location	
	West	East
Month	Coed Cynfal Llan- Ffestiniog	Pen Y Coed Llangollen
January	276	101
February	132	44
March	161	74
April	70	21
May	234	91
June	86	35
July	220	54
August	130	51
September	59	60
October	93	46
November	506	148
December	608	168
Total		

Remember Celtic rainforest plants need a humid habitat!
Which site is most humid?
