

# What can we see in a Celtic rainforest in winter?

Watch the video: [Discovering the Celtic Rainforest winter tour](#)

In the video you will see some of the celtic rainforest features listed on the next few slides but not all of them.

We will be asking you which ones you have seen, so remember to keep an eye out for different features.

# Why do you think we didn't see all the features associated with a Celtic rainforest?

What are the reasons that you can think of?

Are there any reasons associated with the time of the year?

What won't be visible to us in winter?

Can you think of any other reasons?

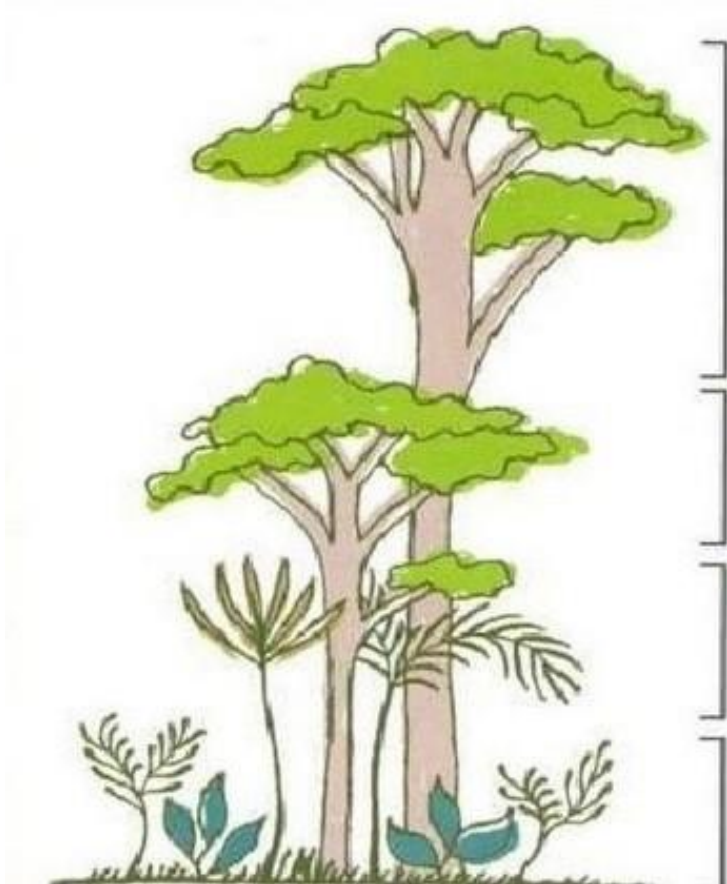

Do you have any other questions?

# The rainforest structure

Watching this video will help you to understand the layers that we explain in the 'Structure of the rainforest' worksheet.

Can you find a section of the video that will help you to answer this question that is asked on the worksheet?

How can we manage the woodland to ensure each layer gets enough light?

Can you visit a Celtic rainforest so you can see for yourself what features are there?

# Why not go for a walk in a woodland and see how many Celtic rainforest features you can find. Do you think you are in a Celtic rainforest?

Could you look for different leaf patterns?  
Can you identify some of the trees?  
Could you measure some of the trees? How?  
Are there any plants growing on the floor of the woodland?

There are recording sheets and  
activity ideas available here:
